

CITY OF LODI COUNCIL COMMUNICATION

TM

AGENDA TITLE: Approve Plans and Specifications and Authorize Advertisement for Bids for Sacramento Street Water Main Installation, Lodi Avenue to Alley South of Lodi Avenue, Project

MEETING DATE: November 19, 2008

PREPARED BY: Public Works Director

RECOMMENDED ACTION: Approve the plans and specifications for the Sacramento Street Water Main Installation, Lodi Avenue to Alley South of Lodi Avenue, project (Exhibit A) and authorize advertisement for bids.

BACKGROUND INFORMATION: This project consists of trenching and installing approximately 204 linear feet of 8-inch ductile iron pipe and other incidental and related work, all as shown on the plans and specifications for the project.

This section of the water pipe at Lodi Avenue and Sacramento Street was identified as needing improvements in the 1990 Water Master Plan prepared by the City's consultant, Psomas. The installation of this water main will rectify the existing water system deficiencies in the area and provide more reliable fire protection to the surrounding properties.

Staff recommends that the City Council approve the plans and specifications and authorize advertisement for bids for the project.

The plans and specifications are on file in the Public Works Department. The planned bid opening date is December 17, 2008.

FISCAL IMPACT: The estimated project cost is \$50,000. There will be a slight increase in the long-term maintenance of the added water pipe.

FUNDING AVAILABLE: Funding for this project is included in the FY 08/09 Budget in the Water Capital Fund (181).

F. Wally Sanderlin
Public Works Director
